DETAILED ACTION

Claim Objections

1. Claims 5-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 16 & 17 rejected under 35 U.S.C. 102(e) as being anticipated by Dormegnie et al (6,691,002).
- 4. In regards to claims 1, 16 & 17, Dormegnie et al teaches determining an effort transmitted between the wheel (5) of a vehicle and a wheel support (11, i.e. longitudinal arm) consisting of mounting the said wheel (5) pivotably on a wheel support (11), the wheel (5) being provided with a tyre (2); pressing the said tyre (5) against an excitation means (3, i.e. roller track) (Column 6, lines 31-52; See Figures 1 & 2); measuring a

Art Unit: 2855

fixed support effort (i.e. forces acting in three perpendicular directions) which is transmitted between the said wheel (5) and the said wheel support (11) when the said tyre (2) is excited with the said excitation means (3), the said wheel support (11) being fixed in at least one direction (X,Y,Z) in relation to the said excitation means (3), characterised by the step consisting in calculating, on the basis of the said fixed support effort, a suspended support effort (i.e. forces acting in three perpendicular directions) which would be transmitted between the said wheel (5) and a wheel support (7, i.e. shock absorber) having a degree of freedom of suspension in at least one said direction in relation to the said excitation means (3) (Column 7, lines 8-65).

Allowable Subject Matter

- 5. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose or suggest the determining an effort transmitted between the wheel of a vehicle and wheel support consisting of the suspended support effort being calculated on the basis of the non-suspended mass of a ground contact system which includes the tyre-wheel assembly and a wheel support which is connected to a suspension device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jermaine Jenkins whose telephone number is 571-272-2179. The examiner can normally be reached on Monday-Friday 9am-530pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on 571-272-2180. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
